

Compliance & Performance Resume

PROFESSIONAL SUMMARY

Zachary Snare is a Junior Web Engineer with experience supporting website development, digital platforms, and technical implementation projects. A graduate of South Hills School of Business & Technology's Associate in Specialized Technology program, he assists with the development, maintenance, optimization, and troubleshooting of websites and web-based systems for a variety of clients. Zachary works closely with designers, project managers, and senior technical staff to implement website functionality, perform research, support content management systems, and resolve technical issues. He has experience with WordPress, web development technologies, website testing, digital accessibility considerations, and cloud-based collaboration platforms. His analytical mindset, attention to detail, and commitment to professional growth support the successful delivery of reliable and user-friendly digital solutions for public sector, nonprofit, education, healthcare, and commercial organizations.
